SEGO
The bright solution

Bright

Create an eyecatcher and attract attention with your illuminated graphics. Powerful OSRAM LEDs provide an evenly lit and stunning background for your event.

Quick

With the easy click - slide - lock mechanism you can set up your SEGO in no time! And with all components in wheely bags, you have the perfect mobile solution.

Modular

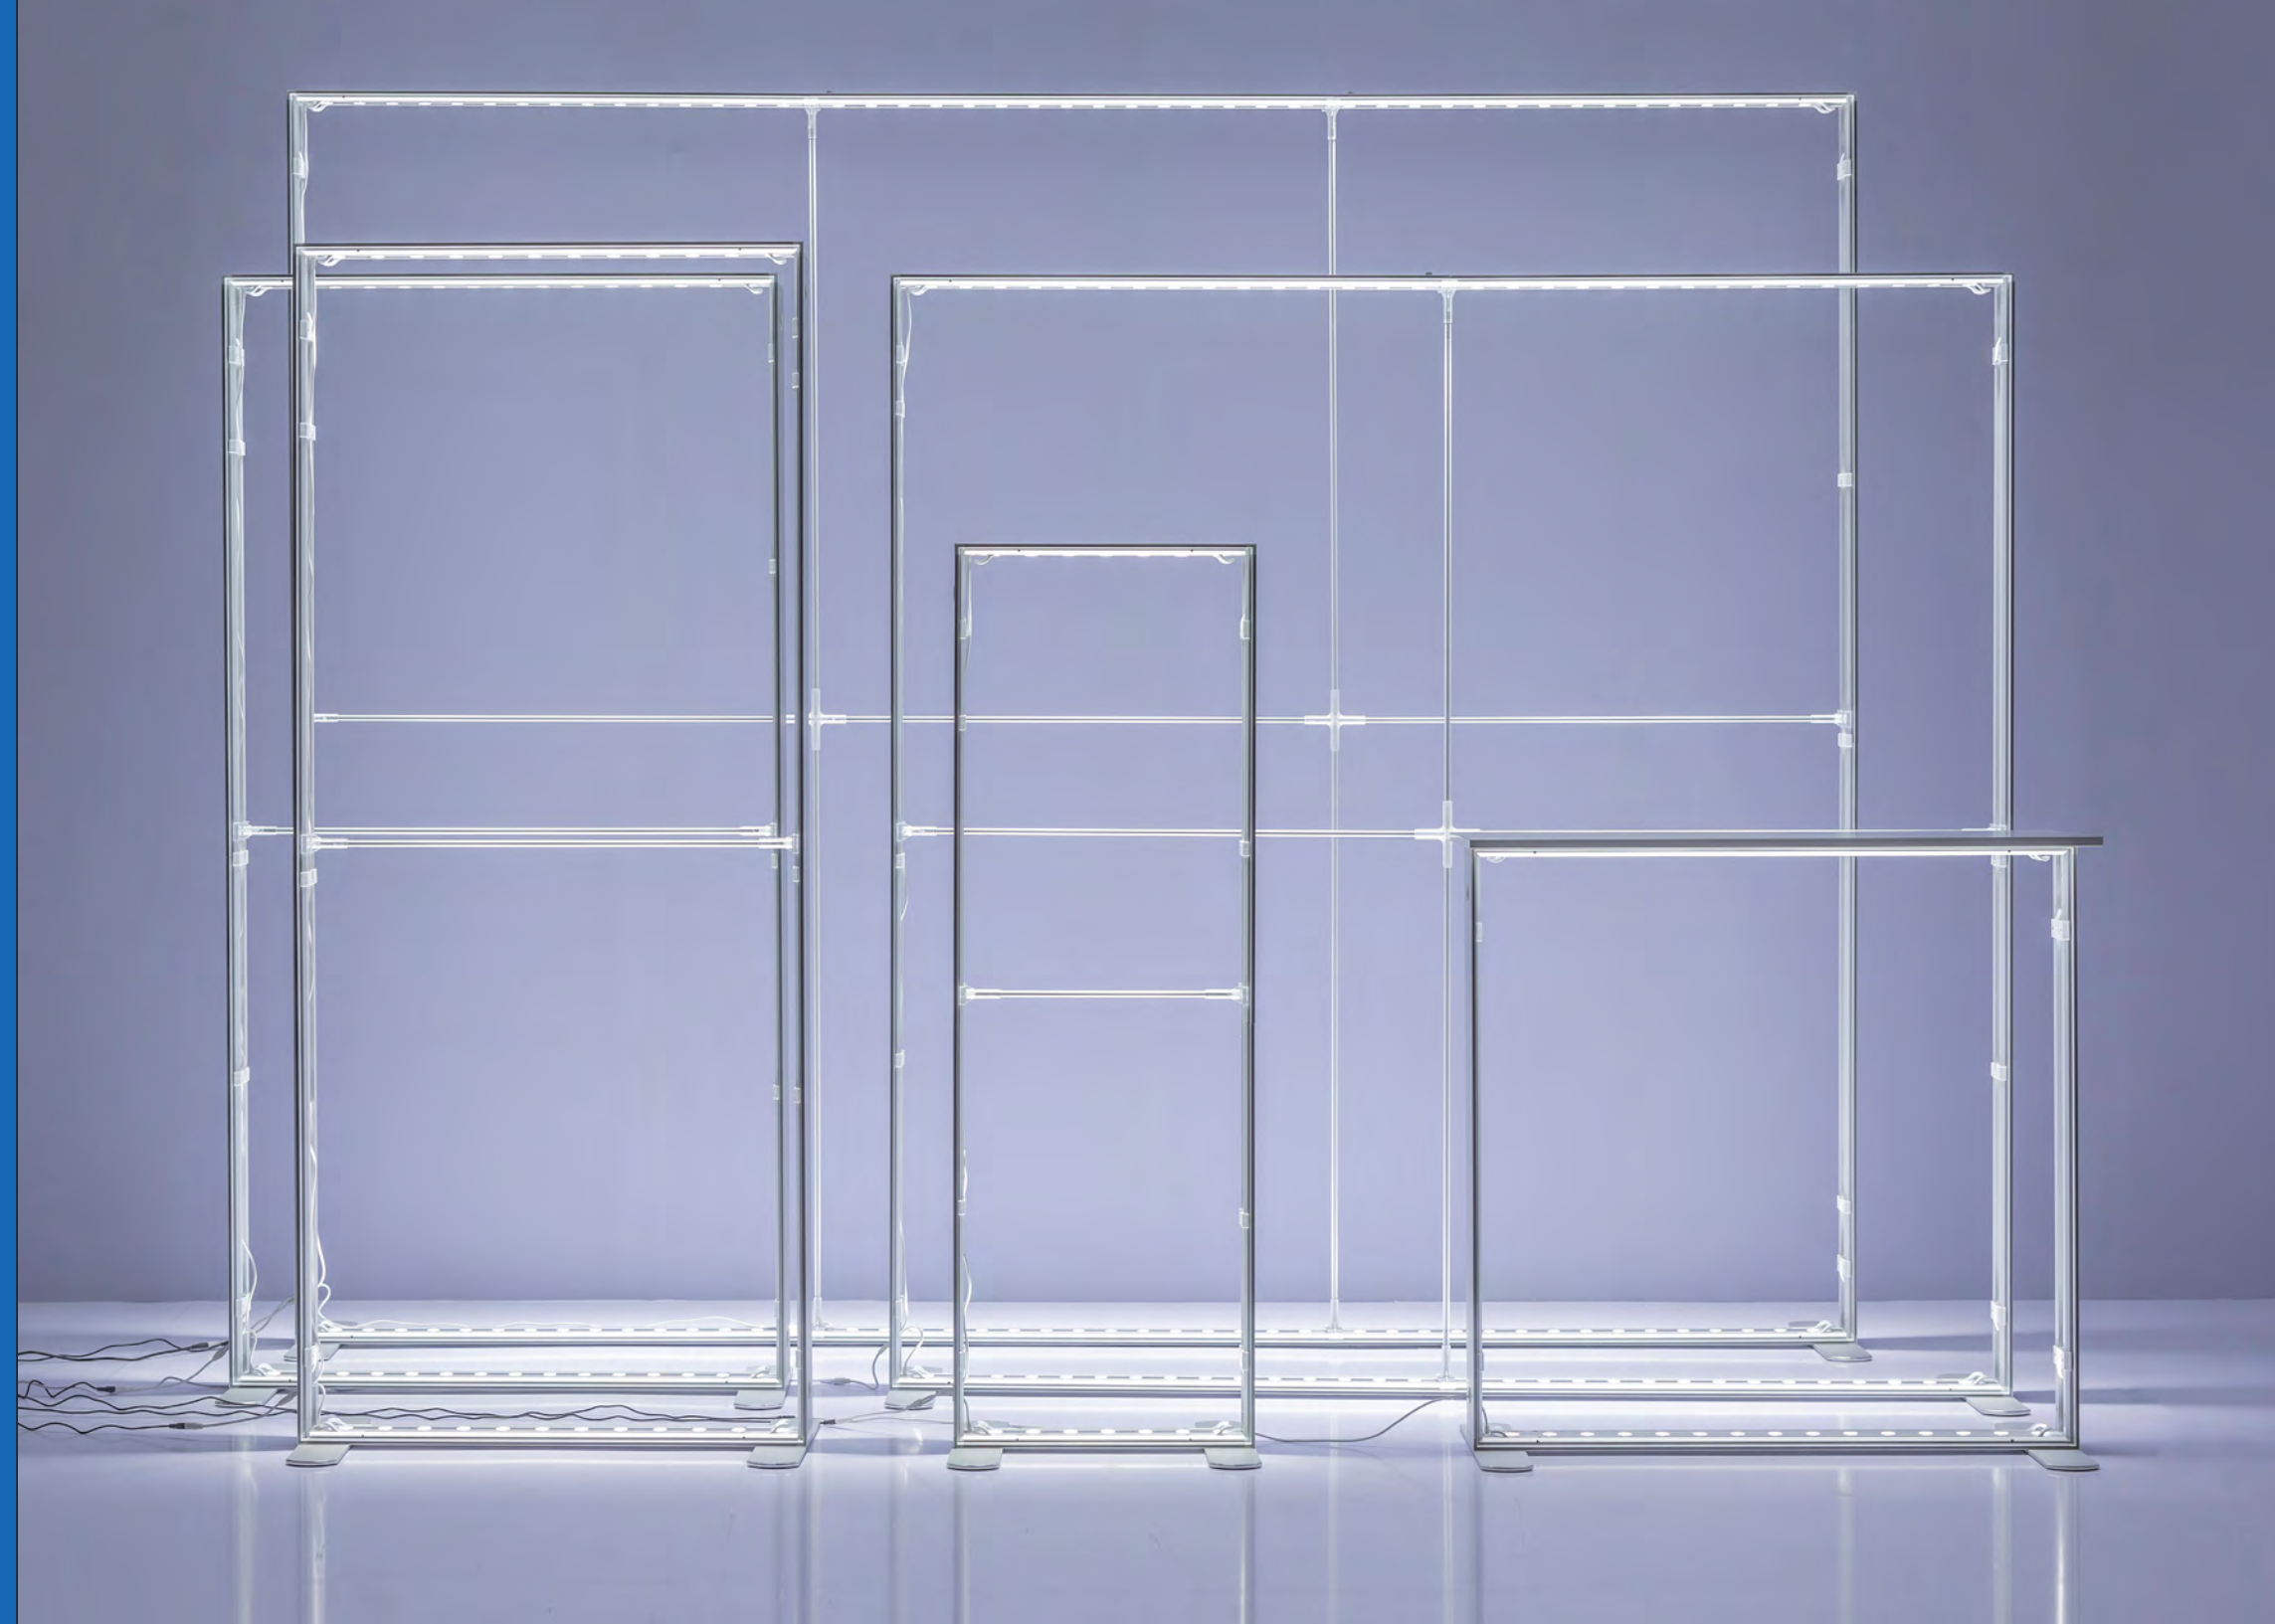

Connect multiple frames together to make an even greater impression! Spaces at events vary? - No problem! Combine different wall lengths and heights, add monitor brackets and shelves to always make the most of your event.

Bright

OSRAM LEDs built into the light bars at the top and bottom of each SEGO frame, provide for evenly lit and beautiful graphics.

Quick

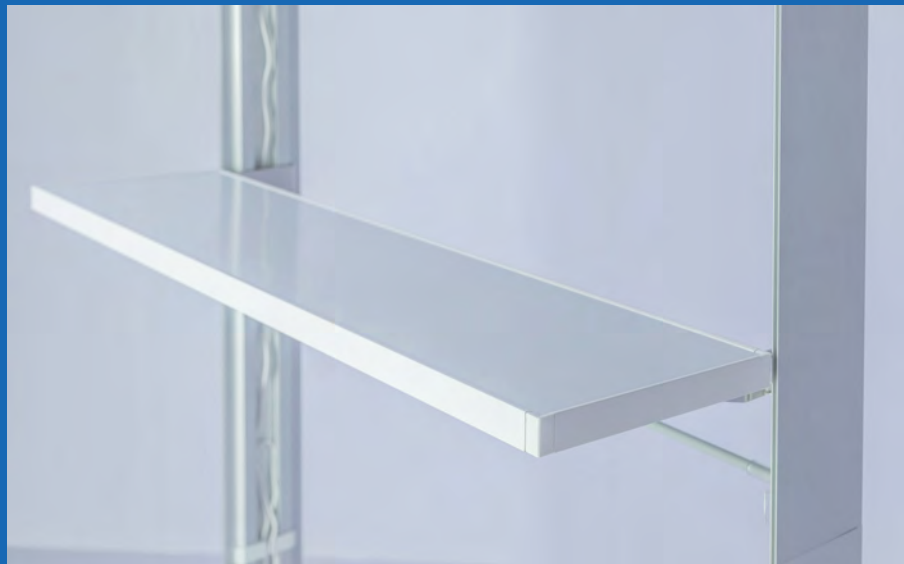

1. Simply click the vertical onto the SEGO foot by pushing it down onto the shaft.
2. Slide the horizontal into the vertical from the front opening.
3. Now push down the latch and finished!

Modular

Combine SEGO frames to build corners - connect different heights - just as you need.
You can also place shelves and monitors on SEGO frames with the easy-to-use accessory.

Mobile

SEGO is available in a trolley bag with wheels. The components have individual compartments to ensure safe transport and easy repackaging.

Connectors

With the SEGO connectors you can connect frames to build your exhibition or event booth. Whether 90° corners, frames of different height or adding a bridge construction, there is an easy solution for every setup.
